Missouri Department of Agriculture Department Overview

The Missouri Department of Agriculture (MDA) provides leadership for Missouri's agricultural community through programs that build economic opportunity. Our mission is to be the leading state agency in the marketing of all food and agricultural products. This continues to complement our regulatory functions. We value agricultural innovation and success. Through agricultural business development and market information, we maximize the return on today's agricultural products while implementing strategies to generate opportunities for the future. Concurrently, through animal and plant health, grain storage auditing and inspection, weights and measures testing, and milk inspections, MDA provides the framework for food safety and helps ensure the integrity of the marketplace. MDA also builds partnerships with industry, universities, and all levels of government to ensure that producers and agribusinesses have the tools necessary to reach their full potential.

PROGRAM DESCRIPTION

Department: Agriculture

Program Name: Director's Office

Program is found in the following core budget(s): Director's Office

1. What does this program do?

The mission of the Missouri Department of Agriculture (MDA) is to be the leading state agency in the marketing of food and agricultural products. To realize the mission, the Director of Agriculture assigns duties among departmental units, obtains financial and personnel resources to discharge departmental responsibilities, and monitors departmental performance. This core request provides financial resources for the following administrative functions:

Financial Services

Financial services are provided through the coordinated efforts of budget and planning, the fiscal office, and grants management. Budget and Planning is responsible for the development and coordination of the department's strategic plan and annual operating budget. The office also administers the ethanol and biodiesel producer incentive funds, including the development of state regulations that guide the program. In addition, Budget and Planning coordinates the development of fiscal notes on legislation being considered by the Missouri General Assembly.

The Fiscal Office provides purchasing, payroll, accounting, and internal audit services for each division as well as the State Fair and the State Milk Board. Specific tasks performed include: processing purchases and vendor payments; preparing payroll; compiling statistical information; and assisting in the preparation of the annual budget request. The fiscal office is also responsible for inventory control, leased and state-owned office space, vehicle management, and mail services for the department.

Grants Management seeks and identifies additional funding opportunities that will leverage current state funding and improve the effectiveness of department activities. Responsibilities include grant writing, proposal development, compliance monitoring, technical review, staff training, a range of accounting and administrative services, and serving as a direct liaison with federal government sources.

Human Resources

Human Resources assists in recruiting, selecting, placing and training employees. Other responsibilities include management of employee fringe benefit programs such as group life and medical insurance, workers' compensation, retirement and leave; maintenance of employee personnel records; and administration of the employee performance appraisal program.

Strategic Communications

Strategic Communications is responsible for coordinating all media and public relations activities for the department's five divisions. The main duties of the program's staff include writing news releases, soliciting news coverage of special events, handling media inquiries, planning and coordinating news conferences and briefings, reviewing and editing printed materials, developing information brochures, marketing special events, serving as a liaison to the governor's office and acting as an aide to the director. The public information office is involved in most of the department's events, and a majority of the workload is associated with those activities.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Chapter 261 RSMo.

2. CORE DESCRIPTION

The Veterinary Student Loan program was established by SB 320 (2007) to address the statewide shortage of large animal veterinarians. The legislation allows six (6) students to receive loans of \$20,000 per year for up to four (4) years of veterinary school. Upon graduation, participants are forgiven \$20,000 for each year of service in a designated area of need. Current funding can provide loans for six (6) students for one (1) year of education, and recipients are required to repay with only one (1) year of veterinary service. However, one year of service may not be long enough for the veterinarian to develop relationships with clientele and the community that would lead to a commitment to the area of need for the duration of their career.

2. CORE DESCRIPTION

FY13 is the last year of incentives for the two remaining eligible ethanol producers (St. Joseph/Lifeline Foods and Carrollton/Show Me Energy). The FY13 request is \$3,950,000 less than the FY12 appropriated funding for ethanol incentives.

The Department of Agriculture is charged with administering the "Missouri qualified Fuel Ethanol Producer Incentive Fund" authorized in Section 142.028 RSMo. Under current statutes, a qualified ethanol producer is eligible for a total grant in any calendar year equal to 20 cents per gallon for the first 12.5 million gallons of qualified fuel ethanol produced plus five cents per gallon for the next 12.5 million gallons of qualified ethanol produced from Missouri agricultural products in the fiscal year. A Missouri qualified ethanol producer is eligible to receive grants for a total of 60 months.

2. CORE DESCRIPTION

FY13 is the last year of incentive payments for four (4) of the plants currently producing biodiesel. Under the plan developed during the FY11 budget process, the FY13 request also includes deferred payments earned but not paid in FY11. The FY14 budget request will include deferred payments earned but not paid in FY12. The amount requested in this core decision item, when added to the biodiesel new decision item, provides payment for all anticipated FY13 production (\$10.8 million) and all of FY11 deferred payments (\$7,404,234). The core request plus the new decision item (\$6,316,734) provides total biodiesel funding of \$18,204,234.

The Department of Agriculture is charged with administering the "Missouri Qualified Biodiesel Producer Incentive Fund" authorized in Section 142.031 RSMo. Under current statutes, a qualified biodiesel producer is eligible for a total grant in any fiscal year equal to 30 cents per gallon for the first 15 million gallons of qualified fuel ethanol produced plus ten cents per gallon for the next 15 million gallons of qualified biodiesel produced in the fiscal year. A Missouri qualified biodiesel producer is eligible to receive grants for a total of 60 consecutive months. There are currently thirteen (13) biodiesel plants currently eligible to receive producer incentives. However, several of these plants are not currently in operation and this request assumes only four (4) plants will receive producer incentives in FY13. Those four facilities are located in Deerfield, Kansas City, Lilbourn, and St. Joseph.

PROGRAM DESCRIPTION

Department: Agriculture

Program Name: Biodiesel

Program is found in the following core budget(s): Biodiesel Incentives

1. What does this program do?

The Department of Agriculture is charged with administering the Missouri Qualified Biodiesel Producer Incentive Fund authorized in Section 142.031 RSMo. Under current statutes, a qualified biodiesel producer is eligible for a total grant in any calendar year equal to 30 cents per gallon for the first 15 million gallons of qualified biodiesel produced from Missouri agricultural products in the fiscal year plus ten cents per gallon for the next 15 million gallons of qualified biodiesel produced. A Missouri qualified biodiesel producer is eligible to receive grants for a total of 60 months.

There are thirteen (13) biodiesel plants that are currently eligible to receive producer incentives. These plants are located in Bunceton, Carrollton, Deerfield, Dexter, Hayti, High Hill, Kansas City, Lilbourn, Mexico, Moberly, and three plants in St. Joseph. However, several of these plants are not currently in operation and this request assumes only four plants will receive producer incentives in FY13. Those four facilities are located in Deerfield, Kansas City, Lilbourn, and St. Joseph.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

The state statute is Section 142.031 RSMo.

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

6. What are the sources of the "Other " funds?

Not applicable.

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

FY13 is the last year of incentive payments for four (4) of the plants currently producing biodiesel. Under the plan developed during the FY11 budget process, the FY13 request also includes deferred payments earned but not paid in FY11. The FY14 budget request will include deferred payments earned but not paid in FY12. The amount requested in this decision item, when added to the biodiesel core request, will provide payment for all anticipated FY13 production (\$10.8 million) and all of FY11 deferred payments (\$7,404,234). The FY13 core request (\$11,887,500) plus this new decision item provides total biodiesel funding of \$18,204,234.

The Department of Agriculture is charged with administering the Missouri Qualified Biodiesel Producer Incentive Fund authorized in Section 142.031 RSMo. 2. CORE DESCRIPTION

The Agriculture Business Development Division (ABDD) helps increase the profitability of Missouri's farmers and agribusinesses by increasing international and domestic sales of agricultural products grown, raised or processed in Missouri. Our vision is to be a leader in agriculture business development and a valued partner to Missouri's farmers, agribusinesses, farm groups, and public sector organizations. Our mission is to provide business development services including international and domestic marketing assistance, targeted business counseling, industry facilitation, product promotion and financial programs.

The Division provides specific services, including business counseling, domestic marketing assistance, international marketing assistance, and product promotion. We also have a portfolio of branded programs and brand initiatives to increase consumer awareness and sales of products grown, raised and processed in Missouri, including AgriMissouri (program funding and review included on separate forms), Grow Native! branded program, and the Blue Ribbon Kennel initiative. To help facilitate global sales of Missouri agricultural products, ABDD has a foreign trade office in Taipei, Taiwan. Additionally, ABDD partners with the Missouri Department of Economic Development and trade organizations for in-country representation in other regions of the world.

The Division provides third party unbiased commodity price reporting and information for livestock, grains and hay. In addition, it provides education and livestock grading services for producers which assist in improving the quality of livestock in Missouri. The Division also provides programs and services that support the development of, and create opportunities for, Missouri's agricultural based youth. We encourage young men and women to pursue education and careers in the agriculture industry through programs such as the Missouri Agribusiness Academy. The Division promotes agriculture and MDA services to urban, rural, farm and non-farm audiences as a means of educating and informing the public, and actively works to enhance the awareness and image of agriculture.

PROGRAM DESCRIPTION

Department: Agriculture

Program Name: Business Services and Trade Program

Program is found in the following core budget(s): Agriculture Business Development

1. What does this program do?

The Agriculture Business Development Division (ABDD) helps to increase the profitability of Missouri's farmers and agribusinesses by increasing international and domestic sales of agricultural products that are grown, raised or processed in Missouri. Our core customer base is Missouri's farmers, agribusinesses, food processors and forest product companies. Our mission is to provide export development services, including, export counseling, export documents, international trade leads, international buyer introductions, and access to financial programs.

To help facilitate global sales of Missouri agricultural products, we have an office in Taiwan and access to the Missouri Department of Economic Development's international offices in China, Japan, Korea, Mexico and the United Kingdom. We cooperate with the Department of Economic Development with international buyer visits, trade missions, shared trade data and other activities to better serve Missouri's exporters. We pool financial and human resources through our membership in the twelve-state USDA Cooperator Group, "Food Export Association of the Midwest" and the national Cooperator Groups, "U.S. Livestock Genetics Export, Inc., "American Hardwood Export Council" and the "American Softwood Export Council". Our memberships in these organizations provide funding to bring international buyers to Missouri, market research, and access to partial reimbursements for export promotion expenditures.

Our primary strategies include:

- a. Access to export promotion funding through the USDA's Market Access Program.
- b. Link Missouri farmers, agribusinesses, food processors and forest product companies with international and domestic buyers.
- c. Fund and manage an office in Taipei, Taiwan
- d. Initiate and cooperate with the Department of Economic Development to increase agribusiness expansion and attraction.
- e. Organize and manage international marketing activities in and outside the United States.

PROGRAM DESCRIPTION

Program Name: Market News Program

Program is found in the following core budget(s): Division of Ag Business Development

1. What does this program do?

The Market News Program compiles daily accurate market information on price, quantity and quality of livestock, grain and hay sold in Missouri. This unbiased market news information is made available to the public including bankers, economists and producers on a daily and weekly basis. Full and part-time market news reporters/graders are employed throughout the state reporting markets from 25 livestock auctions, with several of those markets having multiple auctions per week. In addition to those markets around the state, reporters also report the Interior Missouri Hog market, Missouri Direct Slaughter Cattle, Missouri Daily Cash Grain and a Weekly Hay Summary. Market News is disseminated and available to the public daily through the internet, media (including radio, newspaper and television), market news hotline and the Weekly Market Summary which is available on-line or for a \$25 annual subscription in hard copy. In addition, a newly revamped website is available with a wide variety of market news information, including links to market reports, podcasts of regional and statewide reports and other pertinent market information. The Chicago Mercantile Exchange utilizes our market news information to establish the national daily weighted average feeder cattle index. This information is used as a base for feeder cattle futures contract settlements. All the data collected is archived for future use and reference. Additionally, market reporters are also approved USDA graders. Missouri graders are requested throughout the year to assign grades to different classes of livestock including replacement heifers, feeder cattle, feeder lambs, market lambs, slaughter ewes and goats. This service is educational, adds market value and encourages the production of uniform, high quality animals. These services help Missouri maintain its status as a leader in agricultural production.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

RSMo 261.030 states the director "may collect and disseminate by telegraph, mail or otherwise, timely information useful to producers, distributors and consumers concerning the weather, the supply, demand, prevailing prices, market conditions and commercial movements of farm products."

3. Are there federal matching requirements? If yes, please explain.

The Missouri Department of Agriculture works with the United States Department of Agriculture through a cooperative agreement to provide market news for grain and livestock. A \$10,000 federal grant is received annually for the market news program. The Market News Program also participates in various federal grants for specific projects that do require federal matching requirements.

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

2. CORE DESCRIPTION

This program, established in 1985, increases consumer awareness of products grown, raised and processed in Missouri in order to help Missouri farmers and agribusinesses increase sales of their products. The program assists producers in marketing their products through a variety of marketing channels, including retail, wholesale, foodservice, restaurants, institutions and direct-marketing. The program also works to promote agritourism operations and farmers' markets. The program shifted to a paid membership structure in 2004 in order to provide a steady income stream into the program (as per Section 261.235) and allow for easier tracking of members from year to year. In 2011, the program was expanded to 4 different levels of membership to better meet the needs and requirements of participants. The paid memberships are \$25, \$50 and \$100 dollars and also included a basic free membership listing. Memberships have increased from 345 members in 2010 to over 1,000 members in 2011. The program website, www.agrimissouri.com, was launched in 2004 and updated in 2011 to promote Missouri products and agritourism destinations and help connect producers to consumers and consumers to agriculture. The website has seen a tenfold increase in visitors in 2011. AgriMissouri has also launched additional promotions and initiatives to increase the awareness of Missouri foods.

PROGRAM DESCRIPTION

Department: Agriculture

Program Name: AgriMissouri

Program is found in the following core budget's): AgriMissouri

1. What does this program do?

This program, established in 1985, increases consumer awareness of products grown, raised and processed in Missouri in order to help Missouri farmers and agribusinesses increase sales of their products. The program assists producers in marketing their products through a variety of marketing channels, including retail, wholesale, foodservice, restaurants, institutions and direct-marketing. The program also works to promote agritourism operations and farmers' markets. The program shifted to a paid membership structure in 2004 in order to provide a steady income stream into the program (as per Section 261.235) and allow for easier tracking of members from year to year. In 2011, the program was expanded to 4 different levels of membership to better meet the needs and requirements of participants. The paid memberships are \$25, \$50 and \$100 dollars and also included a basic free membership listing. Memberships have increased from 345 members in 2010 to over 1000 members in 2011. The program website, www.agrimissouri.com, was launched in 2004 and updated in 2011 to promote Missouri products and agritourism destinations and help connect producers to consumers and consumers to agriculture. The website has seen a tenfold increase in visitors in 2011. AgriMissouri has also launched additional promotions and initiatives to increase the awareness of Missouri foods.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Sections 261.030, 261.035, 261.230, 261.235, 348.410

2. CORE DESCRIPTION

The Missouri Wine and Grape Board was created by the Missouri General Assembly in 2004 as an independent political and corporate body of the State of Missouri (Missouri statute 262.820). Prior to this date, the Board existed in an advisory form, with members appointed by the Director of Agriculture in the early 1980's. The purpose of the Board is to further the growth and economic development of the grape growing industry in the State of Missouri.

Moneys deposited into the Wine and Grape fund are to be expended for agricultural marketing development purposes. RSMo 311 states "...there shall be paid to and collected by the director of revenue for the privilege of selling wine, an additional charge of twelve cents per gallon or fraction thereof...The revenue derived from the additional charge imposed shall be deposited by the State Treasurer to the credit of a the Missouri Wine & Grape fund (RSMo 261.035). Monies credited to the fund develop programs for growing, selling, and marketing grapes and grape products grown in Missouri, including all necessary funding for employment of experts in the fields of viticulture and enology as deemed necessary, and programs aimed at improving marketing of all varieties of grapes grown in Missouri; and shall be appropriated and used for no other purpose." The Board is funded by the collection at the rate of 12 cents per gallon. The additional six cents must be used in funding research and advisement of grapes and grape products.

2. CORE DESCRIPTION

The Missouri Agricultural and Small Business Development Authority (MASBDA) was created by the Missouri General Assembly in 1981 as an independent political and corporate body of the state of Missouri (RSMo 348). MASBDA's purpose is to promote the development of agriculture and small business and to reduce, control, and prevent environmental damage in Missouri by providing additional sources of financing at interest rates that are below conventional rates. The authority accomplishes this by issuing agricultural development bonds, tax-exempt small issue bonds, guarantees on loans to livestock producers, direct loans for animal waste treatment systems. Additionally, the authority administers a grant program, tax credit programs, and loan guarantees related to new generation cooperatives and value-added agricultural projects. MASBDA provides fiscal management of a rural development finance program, the Agriculture Development Fund (ADF). MASBDA also administers three of the programs funded through ADF -- the Crop and Livestock Loan Guaranty Program, Alternative Loan Program, and the Agribusiness Revolving Loan Fund.

Program Name: Livestock Feed and Crop Input Loan Guarantee

Program is found in the following core budget(s): MASBDA

1. What does this program do?

The rising cost of livestock feed and livestock feed crop inputs such as fuel, fertilizer and seed, along with other increasing operating costs and disastrous flooding in many areas of the state, are putting more and more pressure on independent family farmers. The increased risk from these rising costs is making it more difficult for farmers to finance their operating costs. This program provides a 50% first loss guarantee on loans made for livestock feed or crop inputs used to produce livestock feed thus encouraging lenders to continue to make loans to farmers for livestock feed and feed crops on competitive terms. Appropriations will only be needed in the event of a default, thus \$1E.

2. CORE DESCRIPTION

Livestock and poultry account for about \$3 billion of the state's agricultural cash receipts. As directed by the state veterinarian, the division administers disease control/herd certification programs under the Diseased Animal Law, including brucellosis, pseudorabies, tuberculosis, EIA, Pullorum-Typhoid, Avian Influenza, Vesicular Stomatitis, Johne's, BLV, Transmissible Spongiform Encephalopathies (TSEs). These programs are designed to control and eradicate the most economically damaging diseases.

The division coordinates state and federal resources in prevention, preparedness, response, and recovery during an animal health emergency. Continuous surveillance by this division for livestock and poultry diseases and other possible emerging pathogens helps prevent outbreaks of infectious animal diseases that could jeopardize the sale and export of Missouri animals and animals products. In some cases, human health may also be directly threatened because many diseases (i.e. Tuberculosis, Brucellosis, Anthrax, Rabies, some forms of influenza and food-borne disease organisms) can also be transmitted directly from animals to humans, increasing consumer concern about food safety and quality assurance. This division works directly with Department of Public Safety, Department of Homeland Security, State Emergency Management Agency, and the Regional Homeland Security Oversight Committees to ensure the most effective planning, training, and equipment is in place to respond to an animal emergency. Recent food born disease outbreaks have raised the need for expansion of the agri-security and Food safety programs. The need for expanded surveillance on response capability is a top priority at all levels.

The Division of Animal Health administers the National Poultry Improvement Program (NPIP) through a Memorandum of Understanding with USDA. The NPIP is an industry/state/federal program designed to control hatchery disseminated diseases and provide basic provisions for disease control and certification of poultry breeding flocks and hatcheries. Diseases included in the NPIP are Pullorum-typhoid, Salmonella enteritidis, Mycoplasmosis, and Avian Influenza.

The Missouri Meat and Poultry Inspection Program (MMPIP) provides consumers with confidence in the safety and wholesomeness of Missouri processed meat and poultry products. The MMPIP provides inspection services to licensed state establishments and conducts frequent sanitation reviews of custom exempt slaughter and meat processing facilities. Warehouses, wholesale distribution, rendering and retail product safety are monitored by MMPIP compliance officers.

The companion animal industry is a source of revenue for Missouri. To protect and promote this industry, the Animal Care Facility Act Program (ACFA) ensures companion animals receive adequate care, proper shelter, and routine veterinary care.

PROGRAM DESCRIPTION

Department - Agriculture

Program Name - Animal Care Facility Act Program

Program is found in the following core budget(s): Animal Health

1. What does this program do?

The health and well being of companion animals raised by commercial breeders, transported and received by animal shelters and humane societies in Missouri is the primary concern of the Animal Care Facilities Act Program (ACFA). Sale of companion animals and pet care supplies is a significant source of revenue and economic activity for Missouri. The ACFA program regulates individuals and entities that enter dogs or cats into commerce as defined under state statute. Specifically, the program works to regulate breeders, dealers, boarders, shelters, and pet stores to ensure that they meet state standards regarding feed, water, shelter, veterinary care, building maintenance, identification and recordkeeping requirements.

The ACFA Program is staffed by Animal Health Officers located throughout the state. The Animal Health Officers balance their schedule with routine inspections, program inquiries, inquiries into unlicensed facilities and educating licensees and the public on adequate care for animals.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

273.329 to 273.357, RSMo

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

1. What does this program do?

Under the direction of the state veterinarian, the division has the responsibility to aid and assist with control and eradication of livestock diseases to insure optimum health of Missouri's livestock and poultry industry. The division works with USDA for disease control, surveillance and eradication of diseases that affect animals. This responsibility is carried out through various subprograms i.e. voluntary disease control/eradication programs, livestock marketing licensing, registration of livestock dealers, rendering plant licensing, dead animal surveillance and livestock brand registration.

The division relies on its two (2) diagnostic laboratories located in Jefferson City and Springfield to perform the diagnostic tests needed to maintain Missouri's disease free statuses, clear animals for export, and to increase the value of Missouri livestock, poultry and companion animal operations. The diagnostic tests performed at MDA diagnostic laboratories provide the division an indication of disease prevalence that may jeopardize the value of the state's livestock and poultry population. The laboratories provide producers diagnosis for livestock/poultry and small animal diseases that are a concern to the producers or that have a negative impact on the industry. Fees charged for testing services are deposited in the "Laboratory Fee Fund" to be used to maintain and improve the level of services offered at each laboratories.

PROGRAM DESCRIPTION

Department - Agriculture

Program Name - State Meat and Poultry Inspection

Program is found in the following core budget's): Animal Health

1. What does this program do?

The Missouri Meat and Poultry Inspection Program (MMPIP) is responsible for ensuring that licensed inspected meat and poultry products are safe, wholesome, and correctly labeled. MMPIP provides ante-mortem, post-mortem and processing inspection to state establishments and conducts frequent sanitation reviews of custom exempt establishments throughout the state. By providing inspection to small and very small meat and poultry facilities throughout the state, MMPIP provides a tool for livestock producers and meat processors to add value and capture additional profits from Missouri meat and poultry products. In addition to inspection, MMPIP must maintain a compliance program to conduct in-commerce surveillance activities at locations such as warehouses, distribution centers, and retail establishments. The MMPIP compliance program enforces all applicable laws, regulations, and FSIS policies and takes appropriate enforcement action in the event of non-compliance or potentially unsafe product entering commerce.

FSIS provides guidance to state MPI programs under cooperative agreements. State Meat and Poultry Inspection (MPI) Programs are an integral part of the nation's food safety system. About 1,900 meat and poultry establishments are inspected under State MPI programs. All of these establishments are small or very small. State MPI programs are characterized as providing more personalized guidance to establishments in developing their food safety oriented operations. (USDA/FSIS, 2009)

Through comprehensive reviews, FSIS determines whether MMPIP is at least "equal to" the Federal inspection program, and includes evaluation of the following nine components: Statutory Authority and Food Safety Regulations, Inspection, Product Sampling, Staffing and Training, Humane Handling, Non-Food Safety Consumer Protection, Compliance, Civil Rights, and Financial Accountability.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Federal Meat Inspection Act - Title 21, Chapter 12, U.S.C. 601 et seq.; Code of Federal Regulations, Title 9; Part 200 to end
Chapter 265, RSMo, Poultry Products Inspection Act, Title 21, Chapter 10, U.S.C. 451 et seq, Humane Slaughter Act, Title 7, Chapter 48, U.S.C.
Food Safety and Inspection Service Cooperative Agreement No. 1237-A-470

3. Are there federal matching requirements? If yes, please explain.

2. CORE DESCRIPTION

The Indemnity Program provides funding to control and eradicate animal diseases by removal and depopulation of disease-infected or toxin exposed animals. Rapid detection, containment, and elimination of disease-infected animals is the surest method to guard against further spread of disease as well as depopulation of animals with toxins above acceptable levels to enter the food supply safely. This funding also helps to minimize economic losses to producers whose livestock have been destroyed.

2. CORE DESCRIPTION

The Grain Regulatory Services Program is a statutorily mandated program that provides regulatory oversight to the grain warehouse and grain merchandising industry, which annually generates nearly **\$5 billion** in economic activity. This oversight ensures the 50,000 Missouri grain farmers of a financially stable grain marketing system where they can both store and merchandise their grain production. Audits of the incentive payments for ethanol and biodiesel production are completed by the GRS program. In addition, the GRS program conducts commodity checkoff audits to verify collection of assessments for the corn, soybean and beef councils. GRS also administers the Missouri Agricultural Mediation Program (MAMP) which provides dispute resolution services to Missouri farmers who utilize USDA programs. The MAMP is funded by a grant provided through the Farm Service Agency of USDA.

Program is found in the following core budget(s): Grain Regulatory Services

1. What does this program do?

Missouri producers annually harvest up to 725 million bushels of grain valued at more than \$4.8 billion, making grain production one of the state's top industries. The Grain Regulatory Services (GRS) Program licenses, bonds and audits grain warehouses and grain dealers to ensure financially sound grain markets for Missouri's farmers to store and merchandise their grain. Audits of the ethanol and biodiesel incentive payments are conducted by the GRS program. In addition, the GRS program conducts commodity checkoff audits to verify collection of assessments, and administers the Missouri Agricultural Mediation Program (MAMP) which provides dispute resolution services to Missouri farmers who participate in USDA programs. The MAMP is funded by a grant provided through the Farm Service Agency of USDA.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Missouri Grain Dealer Law 276.401-276.582 RSMo & Missouri Grain Warehouse Law 411 RSMo

3. Are there federal matching requirements? If yes, please explain.

Yes, the MAMP requires the state to match 30%. GRS program has no matching requirements.

4. Is this a federally mandated program? If yes, please explain.

No

2. CORE DESCRIPTION

The Grain Inspection Services Program provides unbiased third-party inspections to determine the quantity, quality, and condition of grain. Inspections are not mandatory except for grain destined for export. Grain producers, buyers, sellers, shippers, and other interested parties request inspection services to facilitate the trading and marketing of grain. Inspection services are provided state-wide through regional inspection offices located in Kansas City, Marshall, New Madrid, St. Joseph, and Vandalia. The program is entirely self-supporting as it charges fees for performing inspections and all costs are paid from revenue earned.

The core request provides sufficient spending authority to operate regional inspection offices and provide "official" grain inspection services throughout Missouri.

4. Is this a federally mandated program? If yes, please explain.

No. USDA is responsible for administering the U.S. Grain Standards Act and the U.S. Agricultural Marketing Act. In accordance with these acts, USDA designates or delegates those responsibilities to state departments of agricultural or private grain inspection agencies. USDA provides compliance and operational oversight of the official grain inspection system. Each official grain inspection agency must apply to USDA for re-designation every three years. Missouri's new designation period begins September 1, 2011 and runs through August 31, 2014.

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

6. What are the sources of the "Other " funds?

Grain Inspection Fee Fund (0647)

PROGRAM DESCRIPTION

Department: Agriculture

Program: Commodity Services Program

Program is found in the following core budget(s): Commodity Merchandising

1. What does this program do?

State law along with state producer checkoff referendums established merchandising councils and implemented checkoff assessment programs for nine agricultural commodities. The Commodity Services Program (CSP) currently provides monthly check off collection, refund, and distribution services for all nine programs. Each month CSP:

1. Receives checkoff assessment reports and payments from up to 1,000 collection points and individual producers.
2. Processes checkoff refunds to producers requesting refunds in applicable programs.
3. Distributes net checkoff collections (collections less refunds) to designated state and national commodity merchandising councils and organizations.

CSP collection and distribution services are mandated for 3 of the 9 checkoff programs. CSP is authorized to provide collection and distribution services for the other 6 checkoff programs if the commodity merchandising councils request those services. Centralized services minimizes administrative costs by eliminating the need for each merchandising council to establish individual systems to collect and distribute check off fees.

The program also conducts annual board elections for seven of the merchandising councils. The elections are conducted on behalf of the Director of Agriculture as stipulated in state statutes and commodity council bylaws.

CSP is self-supporting. All operating costs, refunds, and distributions are paid from commodity checkoff fees or funds received from commodity merchandising councils.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Chapter 265.180, 275.650, 275.454, and 275.466 RSMo

3. Are there federal matching requirements? If yes, please explain.

No

4. Is this a federally mandated program? If yes, please explain.

No

5. Provide actual expenditures for the prior three fiscal years and planned expenditures for the current fiscal year.

PROGRAM DESCRIPTION

Department: Agriculture

Program: Commodity Services Program

Program is found in the following core budget(s): Commodity Merchandising

6. What are the sources of the "Other " funds?

Commodity Council Merchandising Fund (0406); Aquaculture Marketing Fund (0573); Apple Merchandising Fund (0615); Missouri Wine Marketing and Research Fund (0855)

7a. Provide an effectiveness measure.

Compare the amount of Missouri rice checkoff fees collected to potential checkoff collections. Potential collections are equal to 2 cents per bushel on the annual Missouri rice production as reported by the Missouri Agricultural Statistics Service.

PROGRAM DESCRIPTION

Department: Agriculture

Program: Commodity Services Program

Program is found in the following core budget(s): Commodity Merchandising

7b. Provide an efficiency measure.

Measure total program administrative costs (personal service, expense & equipment, fringe benefits, and administrative overhead) to total check off collections.

7c. Provide the number of clients/individuals served, if applicable.

The CSP provides checkoff collection and distribution services for nine merchandising councils. More than 1,000 businesses and individuals serve as collection points and remit checkoff fees to CMAP.

The program also conducts annual board elections for seven of the merchandising councils. The elections are conducted on behalf of the Director of Agriculture as stipulated in state statutes and commodity council bylaws.

7d. Provide a customer satisfaction measure, if available.

PRIOR YEAR ACTUAL AMOUNT OF FLEXIBILITY USED	CURRENT YEAR ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED
None	The Plant Industries division believes that it may need to flex up to 25% of its Personal Services and/or Expense and Equipment appropriation.
3. Was flexibility approved in the Prior Year Budget or the Current Year Budget? If so, how was the flexibility used during those years?	
PRIOR YEAR EXPLAIN ACTUAL USE	CURRENT YEAR EXPLAIN PLANNED USE
Not applicable	The requested flexibility will most likely be used for essential Expense and Equipment expenditures (e.g. maintenance, repair, or replacement of equipment; supply purchases; etc.) that would impair the department's operation if not made.

PROGRAM DESCRIPTION

Department: Agriculture

Program Name: Feed, Seed & Treated Timber

Program is found in the following core budget(s): Plant Industries

1. What does this program do?

The Bureau of Feed and Seed regulates the feed and seed industries through the administration of the Missouri Commercial Feed Law and the Missouri Seed Law. These laws provide food safety and consumer protection. The feed program regulates all animal feed in Missouri including pet food (cat and dog) and specialty pet food (tank and cage). The Feed Laboratory receives approximately 5,000 samples each year to analyze. These samples consist of official samples tested against label claims. Additional samples are also analyzed as service samples, survey samples and custom-mix samples. The seed program regulates agricultural, lawn, and vegetable seed. The Seed Laboratory receives approximately 3,000 samples that are analyzed for purity, noxious weed seed, and germination. The two programs are distinct programs and are offered by no other department in the state or at the federal level. The feed program plays an important role in food safety in cooperation with the U.S. Food and Drug Administration (FDA) in the administration of the Bovine Spongiform Encephalopathy (BSE) Prevention Program in Missouri. The Bureau inspects, reports, monitors, and investigates the compliance of facilities and individuals manufacturing, distributing, or using products containing prohibited mammalian protein to ensure these proteins are not fed to ruminant animals. Two types of inspections are performed for compliance with the uses of mammalian proteins. One is BSE Inspection for state survey and the other is under contract with FDA. This type of inspection is very similar to the state inspection, however, the detail to paperwork is much more in depth. We also perform two types of Good Manufacturing Practices (GMP) inspections. Again, one is our state inspection and other for FDA under contract. As with the BSE inspections, the inspections for FDA require more paperwork. The Bureau also works in cooperation with USDA, AMS in the interstate shipment of seed to ensure that seed shipped into our state meets the requirements of our seed law. We are involved in several other activities including our annual wheat and corn sampling to check for aflatoxin, testing feed products for the presence of prohibited proteins, and supplying seed samples to the Federal Seed Lab in Gastonia, N.C. in order to check for interstate shipping violations.

Treated Timber Program has been incorporated into the Bureau of Feed and Seed; thus, the responsibilities of licensing of all treated timber producers and dealers conducting business within the state of Missouri has been transferred to this bureau. The program regulates the quality and distribution of treated wood products through inspections and sampling of treated timber products. The samples are tested for treatment penetration and retention of the various types of preservatives for different wood products. Laboratory analysis of the treated timber samples are conducted by the Feed Laboratory.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

The Missouri Commercial Feed Law RSMo 2000 sections 266.152 to 266.220, the Missouri Seed Law RSMo 2000 sections 266.011-266.111, and the Missouri Treated Timber Law and Regulations RSMo 2000 sections 280.005-280.140 and 263.190-263.474

3. Are there federal matching requirements? If yes, please explain.

No

Program: Integrated Pest Management Program

Program is found in the following core budget(s): Plant Industries

1. What does this program do?

Integrated Pest Management (IPM) program includes the Fresh Fruit and Vegetable Inspection and the Noxious Weed programs. IPM strategies anticipate pest problems and prevent them from reaching economically damaging levels. The goal of the IPM Program is to assist Missouri producers to reduce dependence on pesticides through increased use of biological control agents, pest-resistant plant varieties and adopting improved cultural management practices. The IPM Program cooperates with several different agencies, receiving grant funding for IPM in Missouri schools, IPM for emerald ash borer management, and development of an on-line Pesticide-Sensitive Specialty Crops Locator used by growers and pesticide applicators.

The IPM Program implemented a demonstration School IPM pilot project at a rural school to reduce the routine use of pesticides. Through improved sanitation, moisture management, reduction of entry sites for pests, better food storage areas, and increased monitoring efforts the pilot school was able to reduce its pesticide applications by over 80% in a year. The cost savings from pesticides almost covered the costs of the infrastructure improvements, changes that will last for years. The IPM program received a third EPA grant to expand the pilot project and promote adoption of IPM practices in other districts which should benefit students and staff by reducing their exposure to potential allergens (from mold, insects, and rodents) and pesticide residues from unnecessary treatments.

Fresh Fruit and Vegetable Inspections assure buyers and sellers of this highly perishable product that commodities are graded and packed to conform to established USDA standards which allows for an orderly marketing system. To facilitate these needs, one state program coordinator is based in Monett, Missouri and covers south Missouri, northwest Arkansas, northeast Oklahoma and southeast Kansas. This person does all terminal market inspections which are inspections requested by Missouri produce wholesalers who feel the produce received does not meet the grade requested or ordered. He is assisted by part-time state inspectors licensed by the U.S. Department of Agriculture, Agricultural Marketing Service (USDA-AMS) to help perform shipping point inspections at the point of origin of Missouri-grown produce to determine that the correct quality and grade of produce is packed and shipped. Federal inspectors are stationed in Kansas City and St. Louis, Missouri. Terminal market inspections confirm quality and grade of produce received by Missouri wholesale purchasers for distribution to retail outlets. Both shipping point and terminal market inspections are provided upon request and at the expense of growers, shippers, or wholesale purchasers. The program is a State and USDA-AMS cooperative effort. Federal cooperation assures national consistency of requirements with similar programs throughout all 50 states.

Program coordinator for Fresh Fruit and Vegetable Inspections is certified to perform USDA audits to verify whether companies or farms are in compliance with Good Agricultural Practices (GAP) or Good Handling Practices (GHP). GAP or GHP certification is becoming a more common requirement by produce shippers to reduce the likelihood of microbial contamination. This service is provided upon request and paid for by the company or farm requesting certification.

The IPM program also administers the statutes involving the control and or eradication of noxious weeds as well as the appointment of Johnson Grass Control Board members in their respective counties.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Missouri Weed Statutes Sections 263.190 to 263.474, RSMo 2011

Fresh Fruit and Vegetable Inspection Program: State statute: RSMO 265.060 and Federal statute: 7 U.S.C. 1621-1627.

3. Are there federal matching requirements? If yes, please explain.

For Fresh Fruit and Vegetable Inspection Program: Under the USDA-AMS Cooperative Agreement, the state agency collects fees established by USDA-AMS for inspections performed by the state. In turn, the state agency reimburses USDA-AMS a percentage of the fees collected. Reimbursement rates are: Terminal Market Rates - 8%. Shipping Point Inspections - 7.7%.

Program: Pesticide Control

Program is found in the following core budget(s): Plant Industries

1. What does this program do?

The Missouri Pesticide program is responsible for regulating the distribution, sale and use of all pesticides in the state of Missouri. The overall goal of the pesticide program in meeting both state and federal statutory responsibilities is to prevent unreasonable adverse effects of pesticide use on the health of the citizens of Missouri and the environment while helping assure the availability of pesticides needed to maintain our quality of life. The use of pesticides is an integral part of the quality and quantity of food and fiber produced for the world; however, pesticides have a wide variety of other uses such as: control of pests that cause structural damage to homes and other buildings; protection of aesthetic value provided by ornamental plants and turf; control of pests which may create health concerns; and the prevention of crop and forest damage by invasive species.

The Bureau of Pesticide Control has four main program responsibilities: applicator certification; pesticide technician licensing; federal initiatives (water quality, worker protection and endangered species); and enforcement. Field activities are performed by employees working from their homes with their main assignment in a specific region of the state. The Bureau has averaged 9,563 investigations and inspections over the past three fiscal years including: pesticides at the retail, wholesale and producer levels; applicator use records and dealer sales records; certification credentials; applicator training records; direct supervision requirements; and the inspection of use and alleged misuse of pesticides. The Bureau of Pesticide Control continues to maintain a Performance Partnership Grant with the EPA and receives federal funds in support of the program.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

The Missouri Pesticide Use Act, Sections 281.005 to 281.115, RSMo 2000. The Missouri Pesticide Registration Act, Sections 281.210 to 281.310. The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), Sec. 24. [136v] AUTHORITY OF STATES.

3. Are there federal matching requirements? If yes, please explain.

Approximately 81% of federal grant program funds received require a 15% match of state funds. Approximately 19% of federal grant program funds received require a 50% match of state funds.

4. Is this a federally mandated program? If yes, please explain.

No, however, if Missouri lost program primacy, the federal government (through the Environmental Protection Agency) would pursue program management.

PROGRAM DESCRIPTION

Department: Agriculture

Program Name: Plant Pest Control

Program is found in the following core budget(s): Plant Industries

1. What does this program do?

The Plant Pest Control Bureau works to: 1) to prevent the introduction and spread of harmful plant pests within the state of Missouri and to areas outside our borders; 2) provides plant regulatory services (i.e., inspections, certifications, etc.) necessary for the movement of agricultural products in national and international markets; and 3) provides consumer/industry protection and education in areas of pest prevention and control. These goals are met through the annual inspection of all nursery stock grown in the state, inspection of some stock entering the state from outside sources, significant exotic pest survey activities, and export certification as requested and needed. Nursery stock is a major pathway for exotic pests to gain entrance to our state (gypsy moth, emerald ash borer, sudden oak death, Ralstonia solanacearum R3B2, Thousand Cankers Disease of Walnut). Once here, these pests cause millions of dollars of damage, not only to nursery/landscape plants but also to agronomic and horticultural food/feed crops, forest industry products and our native forest habitats. Early detection and management is a primary goal of this program.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

The Missouri Plant Law, Sections 263.010 to 263.180, RSMo 2000. The Missouri Apiculture Law, Sections 264.011 to 264.101, RSMo 2000.

This request will protect both growers of specialty crops and traditional commodity growers from problems associated with pesticide drift. Acreages of specialty crops increased by 20% from the previous Ag Census with a large increase in acres converting to or certified organic. Many of these crops are sensitive to drift from pesticides. Funding will allow expansion of the current Pesticide-Sensitive Crops Registry by joining DriftWatch based at Purdue University. DriftWatch will provide enhanced services, especially for pesticide applicators, such as electronic notification of new field locations and additional map layers that identify watersheds for drinking water and at-risk habitats, in addition to locations of specialty crop fields and honey bee hives. Information on the Missouri DriftWatch site will be managed by MDA while Purdue will provide IT services, develop new applications, and house the network servers for all DriftWatch member states. This will make Missouri's services to specialty crop growers and pesticide applicators consistent with other DriftWatch states (IN, IL, MI, WI, and MN with other states joining) and make it convenient for applicators working across state lines to find sensitive locations. Pesticide-sensitive crop registries such as these are used by growers and applicators to facilitate communication and reduce the risk of pesticide drift.

If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)									
<p>Requested funding level is based on one-time cost of \$25,000 to format current Pesticide-Sensitive Crop Registry information for Purdue University's established DriftWatch program. Purdue will provide IT services and in addition will develop additional program applications for member states. Annual costs of \$16,000 include printing and mailing educational materials to specialty crop growers and pesticide applicators, in-state travel to key events to promote program to growers and applicators, and an annual maintenance fee for Purdue to house the databases, servers and to manage overall computer operations as needed to keep the registry running. IT costs are shared by DriftWatch member states. No new FTEs are needed.</p>

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

The pesticide program currently utilizes an outdated and inefficient computer program developed by EPA in 1984. The system is unable to provide detailed reports needed for effective management of resources. Data must be compiled at the office instead of the field level and it must be accessed multiple times during the process. A web-based application that can be populated via electronic downloads from hand-held units in the field will improve customer service to businesses by reducing processing time and efforts, reduce the multistep handling of paperwork, and enable timely and efficient utilization of existing resources.

AUTHORIZATION: The Missouri Pesticide Use Act, Sections 281.005 to 281.115, RSMo 2000. The Missouri Pesticide Registration Act, Sections 281.210 to 281.310. The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), Sec. 24. [136v] AUTHORITY OF STATES.

Funding for this project would largely be a one-time amount for the purchase of equipment and programming costs. Based upon 8 inspectors, pad units would be approximately \$800 each for a total of \$6,400. Approximately \$85,000 would be used for a one-time program development fee. A portion of the funding would be a core increase to support data plans required by the web-based format. Monthly charges would be approximately \$90/month/inspector, totaling \$8,640 per year. This request includes an \$8,640 core increase and a \$91,400 one-time equipment purchase and program development fee. 3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

The Plant Industries laboratory is currently unable meet the increased demand for its services. As a result, it is unable to adequately ensure the safety of livestock feed and pet food, effectively monitor the treated timber sold within the state, or adequately diagnose nursery stock pests and diseases. To ensure food safety and producer/consumer protection, the laboratory analyzes over 5,500 feed and treated timber samples annually and performs up to 30 different types of chemical analysis on each sample (~54,000 tests per year). In addition, the number of treated timber samples received by the laboratory has more than doubled within the last year. The treated timber market has also shifted from preservatives such as CCA and ACQ to the point where over 70% of the samples received at the laboratory have been treated with MCA preservative. The laboratory does not currently have the capability to test the MCA preservative and must send the samples to an outside laboratory for testing, which reduces the lab's ability to obtain quick results and effectively monitor the treated timber produced and sold within the state. Furthermore, the laboratory is unable to meet the increased demand for diagnostic services in regard to nursery stock diseases, which include foreign source plants that may host exotic plant diseases of concern not only to nursery stock but to field crops, Missouri forest commodities, and native flora.

4. DESCRIBE THE DETAILED ASSUMPTIONS USED DERIVE THE SPECIFIC REQUESTED AMOUNT. (How did you determine that the requested number of FTE were appropriate? From what source of standard did you derive the requested levels of funding? Were alternatives such as outsourcing or automation considered? If based on new legislation, does request tie to TAFP fiscal note? If not, explain why. Detail which portions of the request are one-times and how those amounts were calculated.)

Chemist: This position will assist in mycotoxin testing, MCA treated timber testing, and the evaluation/development of additional testing methods for livestock feed, pet food, and new preservatives used in treated timbers. We are currently outsourcing some of the mycotoxin and treated timber testing but it can takes weeks to get any kind of results back from an outsourced laboratory. By that time the feed and treated timber products are most likely gone from inventory. It is important for our laboratory to maintain a quick turn around in results so that the products can be effectively monitored. In addition, the cost of operating the Plant Industries lab is substantially less than the cost of contracting with private laboratories (see chart 6B - Cost Comparison of Plant Industries' lab and private labs).

Lab Tech: This position will help meet the increased diagnostic needs for nursery stock diseases, which include foreign source plants that may host exotic plant diseases of concern not only to nursery stock but to field crops, Missouri forest commodities, and native flora. The position will also prepare detailed control recommendations for the affected Missouri business for whom the diagnosis was performed. Diagnostic services also support the international export of plant commodities and the fruit tree and grapevine virus-free certification program as well as critical emergency survey diagnostics when exotic diseases are potentially introduced into the state. This position will also provide diagnostics to support Thousand Cankers Walnut Disease and to adequately fulfill statutory responsibilities.

E&E: The laboratory currently has approximately \$900,000 in equipment that requires routine maintenance and repairs. Over the last two years, there has been an estimated 20% increase in the cost of consumables purchased by the laboratory. The current E&E budget is insufficient to meet the need for consumables to run the laboratory tests or maintain the laboratory equipment. This request increases the lab's core operating budget to meet the increased costs of laboratory supplies and equipment maintenance & repair.

2. CORE DESCRIPTION

The primary purpose of the Gypsy Moth and Thousand Cankers Disease Program is to prevent or delay the establishment of gypsy moth and thousand cankers in Missouri. Establishment of these pests would be devastating to Missouri's \$5 billion forest products industry and \$250 million nursery and landscape industry. It would also have a severe impact on the tourism industry and our native forest habitats. Of Missouri's 14.6 million acres of forest land, 12.5 million acres is oak, the gypsy moth's preferred host and the primary component of our forest products industry. The introduction of thousand cankers of walnut would cause an estimated \$850 million loss to our state's economy. Missouri is the nation's leader in black walnut trees and nut production. Prevention is accomplished through a comprehensive, cooperative annual survey for both of these major forest and agricultural pests. The program is directed by the State Entomologist (Program Manager) and operates within the Bureau of Plant Pest Control.

2. CORE DESCRIPTION

The Weights and Measures Division encourages economic and agricultural growth while protecting the public through regular inspection and surveillance programs. The division is charged with the responsibility of assuring that commercial weighing and measuring devices are accurate, appropriate for their intended use, and installed and maintained properly by their owner or user. The division provides surveillance of weighing and measuring practices to prevent unfair or deceptive dealing by weight or measure in any commodity or service advertised, sold or purchased in the state. Precision calibration and metrology certification services are provided to users of physical standards and weighing and measuring equipment. Motor fuels are tested to insure they meet advertised grade and octane specifications. Premises utilized for the sale of fuels are inspected to assure the public is safe from fire and explosion.

If flexibility is being requested among divisions, provide the amount by fund of flexibility you are requesting in dollar and percentage terms and explain why the flexibility is needed.	
DEPARTMENT REQUEST	
We are requesting flexibility in the Weights and Measures' General Revenue (GR), Federal, and Other Funds Personal Service and/or Expense and Equipment appropriation, provided that not more than twenty percent (25%) flexibility is allowed between each of these appropriations. This flexibility is needed to maximize the efficiency of available financial resources and to meet the department's statutory responsibilities.	
2. Estimate how much flexibility will be used for the budget year. How much flexibility was used in the Prior Year Budget and the Current Year Budget? Please specify the amount.	
PRIOR YEAR ACTUAL AMOUNT OF FLEXIBILITY USED	CURRENT YEAR ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED
\$12,000 GR	The Weights and Measures division believes that it may need to flex up to 25% of its Personal Services and/or Expense and Equipment appropriation.
BUDGET REQUEST ESTIMATED AMOUNT OF FLEXIBILITY THAT WILL BE USED	
The Weights and Measures division believes that it may need to flex up to 25% of its Personal Services and/or Expense and Equipment appropriation.	
3. Was flexibility approved in the Prior Year Budget or the Current Year Budget? If so, how was the flexibility used during those years?	
PRIOR YEAR EXPLAIN ACTUAL USE	CURRENT YEAR EXPLAIN PLANNED USE
Flexed from PS to EE to cover field inspection expenses.	The requested flexibility will most likely be used for essential Expense and Equipment expenditures (e.g. maintenance, repair, or replacement of equipment; supply purchases; etc.) that would impair the department's operation if not made.

PROGRAM DESCRIPTION

Department: Agriculture

Program Name: Device and Commodity Inspection Program - Large Scale Inspection

Program is found in the following core budget(s): Weights and Measures

1. What does this program do?

The Large Scale Inspection Program insures the accuracy and correctness of commercial weighing and measuring devices over 1,000 lb. These types of devices are typically found at grain elevators, rock quarries, fertilizer plants, livestock auctions, landfills, recycling centers, fescue seed buying stations, etc. The Large Scale program consists of 6 inspectors who must hold a valid CDL license to operate a large scale inspection truck. These trucks carry 22,000 lbs of calibrated test weights to perform the required inspections. This program generated \$317,600 in FY 2011.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

State Statute - RSMo Chapter 413

3. Are there federal matching requirements? If yes, please explain.

The Small Scale Inspection Program insures the accuracy and correctness of commercial weighing and measuring devices under 1,000 lbs. These types of devices are typically found at grocery stores, delicatessens, convenience stores, laundromats, hardware stores, lawn and garden centers, farmers markets, etc. Inspectors monitor the accuracy of scanning and point of sale systems, the sale of prepackaged merchandise to insure compliance with package and labeling requirements and net contents statement. This program insures that milk products are not sold below cost and that eggs offered for sale for consumer consumption meet USDA grade standards. This program also enforces country of origin labeling of fresh meat sold at retail level. The program generated \$513,600 in FY 2011.

Program: Fuel Quality

Program is found in the following core budget(s): Weights and Measures

1. What does this program do?

The Fuel Quality Program is responsible for assuring that all motor fuels and other fuels meet minimum quality specifications. Through a vigorous program of inspection, sampling, testing, and enforcement, the program protects Missouri consumers and sellers of petroleum fuels and products. The program also includes testing of alternative fuels such as E85 Fuel Ethanol and Biodiesel blends to ensure the quality and consumer acceptance of these fuels. Missouri drivers spend approximately one and one half cents for every 100 gallons to fund the program and insure fuel quality in the state. This program is the only one in the United States that tests petroleum products with a processing time for most samples of less than 24 hours. This ensures that fuel not meeting specifications is corrected or removed before it is sold, protecting Missouri's consumers. Benefits of the program are twofold: First, economic benefits are derived from consumers receiving quality products and services in the areas of fuel quality, vehicle efficiency and vehicle maintenance. Second, by monitoring compliance with the air pollution control program and fuel quality specifications, the program promotes better air quality and more efficient fuel use.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Program: Grain Moisture Meter Inspection

Program is found in the following core budget(s): Weights and Measures

1. What does this program do?

The Grain Moisture Meter Program assures the accuracy of commercial grain moisture-measuring devices used to buy or sell grain commodities in the state. The Missouri Agricultural Statistical Services estimated the value of grains produced in Missouri to be over \$3.9 billion dollars. Grain moisture-measuring devices are instrumental in determining the price of grain sold in Missouri. Each January, this program registers commercial moisture-measuring devices used in the state. These devices are tested annually utilizing grain samples prepared using a USDA/GIPSA-approved method for determining moisture content. Grain test scales, weight per bushel apparatus, thermometers and calibration charts associated with the moisture meters are also examined during the inspection process.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Program: Grain Moisture Meter Inspection

Program is found in the following core budget(s): Weights and Measures

7a. Provide an effectiveness measure.

Testing of commercial moisture meters give the producer and the elevator or grain dealer the assurance of equality in the transaction. Accuracy in moisture is one of the grain grading constituents that has the greatest effect on the price of the commodity.

7b. Provide an efficiency measure.

The moisture meter inspection program lost one of its two field inspector positions in a fiscal year 2004 core budget reduction. Effective part-time use of a retired inspector enables the program to meet its statutory mandates to inspect all commercial moisture meters once each year. (Meters are tested on calendar year basis which may not be reflected evenly on FY basis. 99+% registered meters are tested annually.)

Program: Metrology Laboratory

Program is found in the following core budget(s): Weights and Measures

1. What does this program do?

The Metrology Laboratory is the custodian of the State Weights and Measures Standards. These precision standards provide the traceability link to the United States Standards at the National Institute of Standards and Technology (NIST) through an unbroken chain of comparisons. The laboratory provides calibration service to the Weights and Measures Division for field test equipment used to test commercial weighing and measuring devices and the state registered service companies that install and service these devices. These calibrations ensure equity in commerce for each weighed or measured commodity bought or sold here in Missouri. The Laboratory also provides calibration service to private manufacturing companies that need accurate and traceable standards in their quality control program. The Metrology laboratory is an active participant in the NIST Regional Measurement Assurance Program (RMAP) which insures traceable calibrations through continuous inter-laboratory comparisons.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

Chapter 413.015.(3) and 413.045 RSMo.

7b. Provide an efficiency measure.

The Metrology Laboratory certifies some 7000 items annually with two people doing the work. This ranks the Missouri laboratory in the upper one half of all state laboratories based on workload surveys conducted by the NIST state laboratory programs manager. Year to year fluctuation in the quantity of items calibrated is due to the two year expiration on field standards and also dependent on Industrial customer needs because those standards are typically not bound by state statute to a two year recertification cycle.

7c. Provide the number of customers/individuals served, if applicable.

Missouri Metrology Lab provided calibration service to 285 Missouri customers and 144 out state customers.

Program: Petroleum Device and Safety Inspection

Program is found in the following core budget(s): Weights and Measures

1. What does this program do?

The Petroleum Device and Safety Inspection Program provides a variety of services that ensure consumer protection and public safety. Under this program, petroleum and propane fuel dispensers located at service stations, marinas, airports, bulk plants, pipeline and barge terminals and other retail/wholesale locations are inspected and tested for accuracy. This also includes propane/petroleum fuel delivery truck meters. To protect the public from fire, explosion and injury, safety inspections are performed at service stations, marinas, airports, terminals and bulk storage plants. Safety inspections also include fuel delivery trucks and aboveground petroleum fuel storage tanks. In addition, this program has an emergency response team that responds to emergencies involving petroleum, propane and anhydrous ammonia products. This program not only accentuates public safety and assists other public safety officials, but also identifies the causes of accidents.

2. What is the authorization for this program, i.e., federal or state statute, etc.? (Include the federal program number, if applicable.)

3. WHY IS THIS FUNDING NEEDED? PROVIDE AN EXPLANATION FOR ITEMS CHECKED IN #2. INCLUDE THE FEDERAL OR STATE STATUTORY OR CONSTITUTIONAL AUTHORIZATION FOR THIS PROGRAM.

Chapter 413 RSMo. requires all commercial weighing devices, (i.e. truck, railroad, hopper, and livestock) to be tested annually. Due to the age of the current fleet of large scale trucks (see table below), excessive downtime for mechanical repairs beyond normal maintenance is prohibiting the Device and Commodity Program from meeting its statutory mandate. Although two new trucks are needed to fully meet the statutory mandate, replacing one of the oldest large scale trucks will allow the program will take a step closer to meeting its statutory requirements. Inspectors average 95 device inspections per month. Should the program lose a truck for an extended period of time, 95 producers/businesses that depend upon the service would not be inspected each month. The program would also lose \$8,225 in revenues and inspectors' performance would be reduced by 16% each month. The 1995 truck has had problems with the motor and the 1997 truck van body is on its second truck chassis. Both are in very poor condition. In addition, one motorized weight mover, approximately 30 years old, will be replaced. The weight movers are utilized in the inspection of vehicle scales and livestock scales.

2. CORE DESCRIPTION

The Missouri State Fair provides an opportunity to communicate the story of Missouri's agriculture in ways that appeal to the state's citizens. This event improves the public's understanding of and appreciation of the role of agriculture. The Missouri State Fair is to showcase and inspire the best in Missouri agriculture, agri-business, domestic arts, and fine arts through competition and educational experiences and to offer quality entertainment. Missouri's agri-businesses add over \$17.5 billion to the state's economy. A prosperous agricultural economy is critical to the overall health of the state's economy. The Missouri State Fairgrounds provide space and facilities for the display of livestock, agricultural products, commercial exhibits, and other agricultural and industrial displays. The 396 acres contain a total of 105 buildings and 20 structures. In addition to their use during the annual State Fair, the fairgrounds host other types of exhibits, entertainment and sales events throughout the year, including livestock shows, group meetings, private functions and camper rallies.

1. What does this program do?

The Missouri State Fair is to showcase and inspire the best in Missouri agriculture, agri-business, domestic arts, and fine arts through competition and educational experiences and to offer quality entertainment. Since the first Missouri State Fair was held in 1901, the event has been a showcase for agriculture. During the past 109 years, however, the state's population has become less familiar with production agriculture as more and more people have moved to urban and suburban areas. The Missouri State Fair blends agriculture, education, good value, and top-name concerts in a unique combination. The fair offers wholesome family entertainment at an affordable price. The Missouri State Fairgrounds provide space and facilities for the display of livestock, agricultural products, commercial exhibits, and other agricultural and industrial displays. The 396 acres contain a total of 105 buildings.

In addition to their use during the annual State Fair, the fairgrounds host other types of exhibits, entertainment and sales events throughout the year, including livestock shows, group meetings, private functions and camper rallies.
